

Domed labels

Adhesive labels with printed design, covered with a transparent layer of polyurethane resin.

WE GIVE LABELS A NEW DIMENSION

Thanks to our 3D labels you will get fast, creative and effective way of presenting your products or company. By covering the surface of a sticker with clear polyurethane resin labels obtain three-dimensional effect, which emphasizes their shape, brightens their colours and protects the surface of stickers. Labels can be manufactured in different shapes and sizes. Given the wide range of print foil and high quality digital or UV digital printing, labels are suitable for indoor and outdoor use and adhere to all smooth surfaces. Our company currently supplies 3D stickers to companies operating in almost all fields of business, e.g. Automotive, healthcare, food industry, manufacturing companies, sports clubs, etc.

Domed labels advantages:

- Very fast production
- Without initial costs for production preparation
- Almost unlimited shape variability
- Colour fastness
- Washability
- Simple application
- High resistance to weathering
- Long term durability

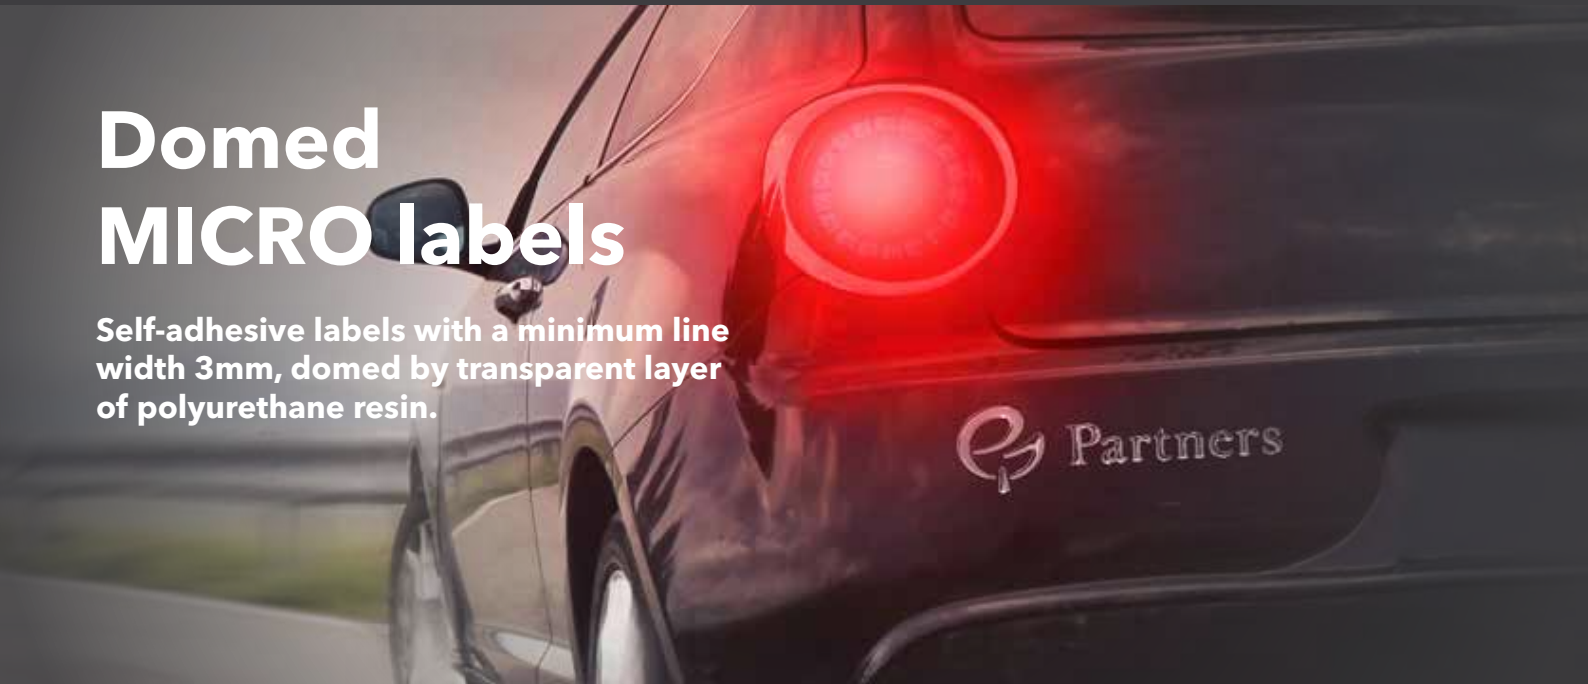

Technological requirements:

- Labels must not contain sharp corners - a minimum radius of 0.5 mm
- Minimum thickness of the embedded surface - 3 mm

Domed MICRO labels

Self-adhesive labels with a minimum line width 3mm, domed by transparent layer of polyurethane resin.

GIVE YOUR STICKERS SPACE

Three-dimensional effect of domed micro labels multiplies the visibility of your company. If you need to quickly and effectively visualize your products or brand, 3D MICRO labels are the ideal solution.

By covering the surface of stickers with clear polyurethane resin, labels obtain three-dimensional effect, which emphasizes their shape, brighten colours and protect the surface of stickers. Labels can be manufactured in different shapes and sizes. Given the wide range of print foil and high-quality digital or UV digital printing, labels are suitable for indoor and outdoor use and adhere to all smooth surfaces. For ease of handling and application of domed micro-labels, these are supplied with a transfer foil, which allows an application of, for example, an inscription in the required form and without the need for complex surveys. Domed micro labels are particularly suitable for marking your products, company cars, etc...
